Expedition to Antarctica
Aboard the Five-Star Le Boréal
January 4 - 17, 2018

UCLA Alumni with Professor Andrea M. Ghez, UCLA Department of Physics and Astronomy
Dear UCLA Alumni and Friends,

“Everything wears an aspect of unreality,” Ernest Shackleton wrote. “Icebergs hang upside down in the sky; the land appears as layers of silvery or golden cloud. Cloud-banks look like land, icebergs masquerade as islands...” Watch as normal human scales and reference points disappear amidst the grandeur of nature in its most pristine form, from extended sunrises that paint the icescape in soft shades of pink to the lingering golden light of the austral summer, where humpback whales, leopard seals and Adélie penguins mingle among sparkling turquoise glaciers and glimmering icebergs. Discover Antarctica, and see how its spectacular illuminations reveal the mystique and contrasts of the most unique place on Earth to those fortunate enough to visit on this extraordinary 14-day program.

Retrace the sea-lanes traveled by storied explorers Ernest Shackleton, Roald Amundsen and Robert Falcon Scott as they sought out the final frontier of “The White Continent” during a nine-night cruise aboard the exclusively chartered, state-of-the-art, Five-Star, ice-class **Le Boreal**. One of the finest vessels plying Antarctic waters, it showcases private balconies in 95 percent of its all ocean-view, deluxe accommodations, encompasses a new generation of ship design and technology, and sets the highest standards in elegance and comfort.

Your Antarctic experience will be enhanced by a comprehensive schedule of exclusive and specially arranged lectures. The onboard expedition team of expert naturalists will guide you on excursions aboard sturdy Zodiac craft to explore the intricate ecosystems and marvelous nuances of the abundant wildlife found ashore, especially penguins and seals who have no fear of humans.

I personally participated in this trip this January, and can attest that this once-in-a-lifetime comprehensive tour is the best Antarctic cruise value offered. The accommodations, meals, educational program and included excursions were all top notch. This Antarctic cruising experience sells out quickly every year, so make your reservation today while Early Booking Savings and space are still available!

Sincerely,

Christel Aragon

Wildlife Conservation

The unique international Antarctic Treaty protects Antarctica’s wildlife and its natural habitats and provides a guide for visitors to this great continent, where no country has sovereignty.

To protect the fragile Antarctic environment, all travelers will go ashore in small groups, so as not to over visit rookeries, disturb nesting sites or disrupt research. All visitors will be asked to take—and leave—nothing ashore.

are brought to the surface by cold Antarctic currents merging with warmer waters of the South Pacific and Atlantic Oceans. The expedition team of naturalist guides will present insightful lectures to prepare you for your first landing in Antarctica. During the evening, enjoy the lingering twilight of the Antarctic summer.

Please note that the ship’s cruising pattern and positionings are dependent on weather, ice and sea conditions and are subject to change.

Cruising Antarctica
Wednesday, January 10, to Sunday, January 14
Cruise below the 60th parallel south to the outer shores and islands of the Antarctic Peninsula, Earth’s last frontier. Here, explore some of the world’s most pristine wilderness, where towering mountains of ice and volcanic rock create precipitous coastlines and islands, and ever-changing patterns of ice stretch as far as the eye can see. In this seemingly harsh environment, a vast array of marine wildlife flourishes, including millions of penguins, countless seabirds and thousands of seals and whales. From spectacular volcanic topography and majestic glaciers to fascinating wildlife and historic outposts, this itinerary reveals the highlights of Earth’s most inaccessible continent for the complete Antarctic experience.

Cruise through breathtaking, glacier-lined Neumayer Channel to rugged Goudier Island. Visit Port Lockroy, originally constructed in 1944 by an eight-man team as an intelligence post for British espionage during World War II and converted into a whaling station and scientific base in the 1950s. It is nestled among glistening mountain peaks as high as 6000 feet, and the surrounding grounds are populated by blue-eyed shags and gentoo penguins. Gain insight into the daily activities of past researchers at the living museum known as “Base A” and mail a postcard stamped with an Antarctica postmark from the official British Post Office.

Just beyond Port Lockroy, the rocky shores of Jougla Point on Wiencke Island offer a rare opportunity to view the skeletal remains of an adult blue whale and to see populous colonies of gentoo penguins and kelp gulls. Call at Petermann Island, the southernmost point of your journey, and watch its thriving rookeries of Adélie and gentoo penguins and blue-eyed shags. Flanked by sheer cliffs of towering glaciers between the Antarctic Peninsula and Booth Island, cruise through the Lemaire Channel, offering views of seven majestic miles of mountains and wildlife combined with fascinating patterns of ice floes. Listen for the low rumbling of Rudolf Glacier as it calves chunks of ice into Neko Harbor, named for an early 20th-century whaling boat. The harbor is surrounded by soaring glaciers and snow-covered mountains and is one of the most dramatic and spectacular sights in Antarctica. Here, make your first “continental landing” in Antarctica.

In Paradise Bay, awesome cliffs of ice descend from the surrounding mountains into the floating iceberg-laden waters along the western coast of the Antarctic Peninsula.
Named by 19th-century whalers who sought shelter in its coves, Paradise Bay is an ideal sanctuary for marine wildlife including humpback whales, crabeater seals and Cape petrels.

Deception Island is actually the rim of a massive dormant volcano crater that encircles a caldera known as Port Foster, where the ship enters through dramatic Neptune’s Bellows, a sublime harbor ringed by snowcapped peaks and sheer cliffs. In Pendulum Cove, see the steaming, geothermally heated waters of the Antarctic.

Observe the amazing colony of tens of thousands of chinstrap penguins at Baily Head. Then walk along the black sand beaches of Telefon Bay to nearby craters, which offer fascinating insight into the volcanic activity that created the island and played a pivotal role in the natural history of the region.

One of the smallest but most beautiful of the South Shetland Islands, Half Moon Island is a crescent-shaped isle known for its craggy volcanic rock formations and tranquil lagoons. It is also the site of Cámar Station, a base monitored by Argentine biologists studying regional wildlife. Here, observe the antics of the island’s colony of chinstrap penguins.

Relax and reflect on board as the ship turns north and attend the Captain’s Farewell Reception.

Exploration of Antarctica

The intrepid deeds of Europeans Roald Amundsen, Robert Falcon Scott and Ernest Shackleton, Americans Admiral Richard Evelyn Byrd and Lincoln Ellsworth and Canadian Sir Charles Seymour Wright, legendary explorers of Antarctica, have long been recounted in gripping personal tales and history books. Admiral Byrd, scion of a distinguished Virginia family, led the U.S. Antarctic expedition (1928-30) and made the first overflight of the South Pole (1929). Byrd later led three additional expeditions to Antarctica and named a large portion of the continent Marie Byrd Land after his wife.

Another American prominent in the exploration of the South Polar region was Lincoln Ellsworth. This Chicago native made the first flight across Antarctica (1935). In the course of his journey, he discovered the mountain range with the continent’s highest peaks, later named Ellsworth Mountains in his honor.
